

Practical Activity: Creating an Object-Oriented Design

**Course:** MSc Computer Science

**Module:** Object-Oriented Information Systems

**Assignment:** ePortfolio

**Date:** Thursday 22nd July 2021

**Student ID:** 126853

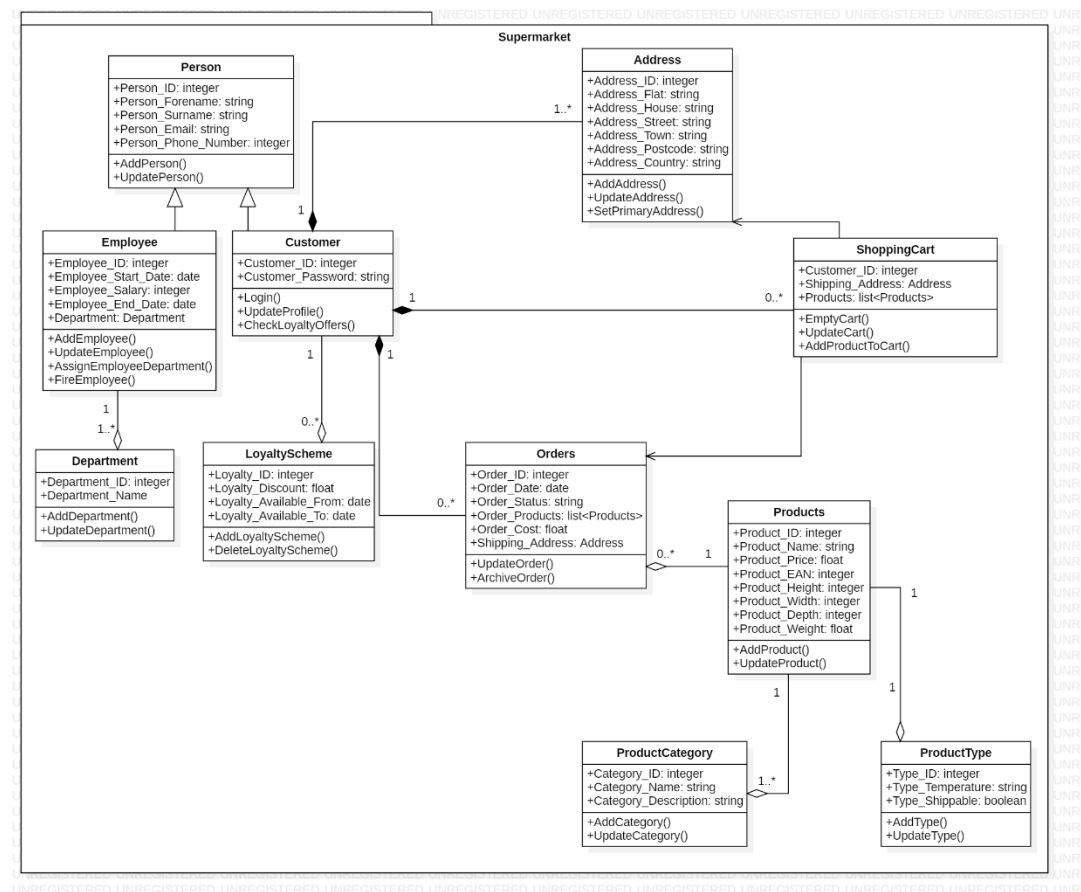

## Object-Oriented Design:

Post:

Hi All,

I've created a Class Diagram for the Supermarket Scenario. I've made an assumption that the Loyalty Scheme is a set of offers which an account is eligible for (As opposed to a membership card type scheme).

This is the first UML diagram I've created in a while, so apologies for any simple mistakes or oversights!
