

Unit 11: Reflection

Course: MSc Computer Science

Module: Object-Oriented Information Systems

Assignment: ePortfolio

Date: Saturday 24th July 2021

Student ID: 126853

Reflection:

During Unit 11 of the Object-Oriented Information Systems module, we have covered web application development using the Flask framework within Python.

Unit Reading for this module included two separate Flask tutorials (Ginberg, 2017) (Pallets Projects, 2010). Both of which provided an introduction to Flask usage and how it can be used to deploy a simple web application.

During this unit, we were required to complete and submit our System Implementation assignment, which was to be based upon the UML diagrams produced within Unit 7 of this module.

Overall, this unit has helped improve my knowledge of web development within the Python environment, whilst focusing on web-specific development and the usage of the Jinja templating engine.
