Unit 6: Reflection

Course: MSc Computer Science

Module: Object-Oriented Information Systems

Assignment: ePortfolio

Date: Saturday 24th July 2021

Student ID: 126853

Reflection:

Within Unit 6 of the Object-Oriented Information Systems module, we have built upon the knowledge learnt within Unit 5 of the module, whilst understanding how to identify potential classes within a provided brief.

The Unit Reading for this unit was from the "Elements of UML Style" book (Ambler, 2003), the LucidChart UML tutorial (LucidChart, n.d.) and the UML 2.0 tutorial (Banas, 2012).

During this unit, we also prepared a series of UML diagrams in preparation for the third seminar, which contained a Class, Sequence and Activity diagram for the doctor/nurse booking scenario we were provided with.

Overall, this unit has helped me further my understanding of the UML conventions whilst providing a basis for the Unit 7 assignment.
