Unit 10: Reflection

Course: MSc Computer Science

Module: Object-Oriented Information Systems

Assignment: ePortfolio

Date: Saturday 24th July 2021

Student ID: 126853

Reflection:

Unit 10 of the Object-Oriented Information Systems module expands upon the SQL knowledge learnt in previous units whilst allowing us to put it into practice.

The unit reading for this unit consisted of chapters 6-8 of the "Database Systems: A Practical Approach to Design, Implementation, and Management" book (Connolly & Beg, 2015). These chapters covered various topics, including Data Manipulation, Data Definition and Advanced SQL techniques.

We have completed the Introduction and Advanced SQL tasks within the Codio environment within this module, allowing us to put our knowledge into practice, providing real-time feedback.

Overall, this unit has helped reinforce the SQL knowledge learnt from the previous units whilst preparing me for the upcoming submission of the final project.
